

Mendota Heights Natural Resources Management Plan

September 16, 2020

The City of Mendota Heights is developing a Natural Resources Management Plan to manage invasive plant species and restore healthy native plant communities.

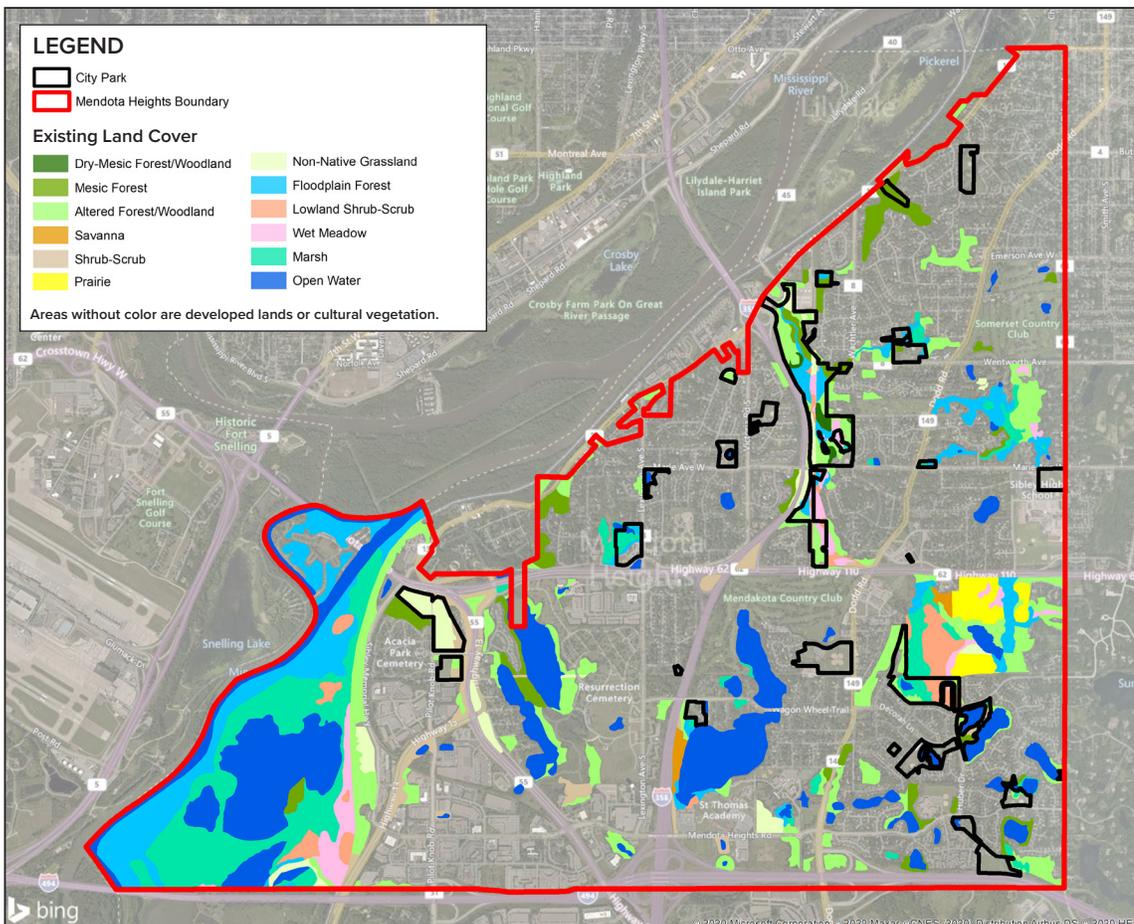

Vision Statement: *To secure the benefits of a healthy environment for people and the natural world, the citizens and leaders of the City of Mendota Heights will protect, improve, and maintain healthy ecosystems and all natural resources in the City.*

What is happening now?

Ecologists are visiting natural areas in Mendota Heights and analyzing ecological data to better understand the condition of those spaces.

What are the next steps?

Mendota Heights Natural Resources staff and Steering Committee are working with a consultant to develop goals and priorities for protecting and restoring native plant communities and habitats.
